SUMMARY

As a Data Analyst, I am excited about finding an underlying patterns in the data and bringing maximum possible value to the business in my next role. Also, I like pies only as a dessert.

WORK EXPERIENCE

NOV 2020	Business Systems Analyst – FOODTECH, Moscow, Russia
MAY 2021	<i>Foodtech app</i> Led the creation of all requirements documentation, including user stories, detailed functional specifications, and process flows. Communicated technical concepts and other subject matter expertise confidently to others, including non-technical people.
AUG 2019	Business Analyst – ORMCO, Moscow, Russia
NOV 2020	<i>Aligner 3D app and Doctor's web portal</i> Successfully led two projects on building a dental ecosystem (web + desktop 3D app). Formalized project concept and technical documentation from scratch. Successfully double-jobbed two roles for half a year: Business Analyst and QA Engineer. Top performer by the annual performance review results.
APR 2019	QA Engineer – ORMCO, Moscow, Russia
MAR 2020	<i>3D solution to design and produce clear aligners</i> Implemented the best Agile testing principles using Atlassian Suite instead of Excel sheets. Organized UAT sessions in US HQ. Was in charge of reporting quality assurance evaluation.
MAR 2018	QA Engineer – MERCEDES-BENZ, Moscow, Russia
MAR 2019	<i>Telematics system for total control over the vehicle with remote access services</i> Curated end-to-end testing of "Mercedes me connect" app (web + mobile) from initiation to live launch in Russia.
FEB 2018	Junior QA – GEEKBRAINS (MAIL.RU GROUP), Moscow, Russia
MAR 2018	<i>Edtech platform focused on IT professions</i> Successfully completed an internship on a real project in Mail.ru Group.
